

ENROLLMENT SCREENING & COURSE GUIDE

AI Web Development Course

6-Week Live Online Course · Practical, project-based training

FORMAT

Live Online

DURATION

6 Weeks

CLASSES

3 Days Per Week

LEVEL

Beginner to Practical

01 ENROLLMENT SCREENING

Before final enrollment, shortlisted applicants will participate in a short screening interview. The interview will normally include approximately 5–10 questions, and the exact questions will not be provided in advance.

PURPOSE OF THE SCREENING

This is not an advanced coding examination. The screening is designed to understand the applicant's:

- Interest in Web Development
- Motivation to learn
- Problem-solving mindset
- Interest in AI and modern technology
- Basic technical understanding
- Learning goals
- Commitment and consistency
- Suitability for the course

IMPORTANT

Previous professional Web Development experience is not required. The screening is not about proving that an applicant already knows Web Development — it is about understanding whether the applicant is genuinely interested, willing to learn, and prepared to participate consistently.

02 WHAT THE SCREENING MAY COVER

Interest & Motivation

Why the applicant is interested in Web Development and technology.

Basic Understanding

Existing awareness of websites, coding, computers or technology.

AI & Technology

Interest in AI tools and modern development workflows.

Future Direction

Freelancing, employment, client work, personal projects or entrepreneurship.

Learning Goals

What they want to achieve by completing the course.

Learning Mindset

How they approach difficult concepts and unfamiliar problems.

Commitment

Ability to attend live classes and dedicate time to practice.

03 COURSE CURRICULUM

WEEK 01

Frontend Fundamentals

- HTML
- CSS
- JavaScript Fundamentals
- Website Structure
- Responsive Web Design
- Basic Website Development

OUTCOME

Understand the foundations of modern websites and build responsive webpages.

WEEK 02

Backend Development

- Node.js
- Express.js
- MongoDB
- Backend Fundamentals
- APIs
- Frontend & Backend Communication

OUTCOME

Understand how the backend processes requests and works with databases.

WEEK 03

React & AI-Assisted Development

- React Fundamentals
- Components
- Props & State
- API Integration
- AI-assisted Development & Debugging
- Understanding AI-generated Code

OUTCOME

Build interactive web interfaces and use AI as a development assistant.

WEEK 04

Practical Website Project

- Project Planning
- UI Development
- Responsive Design
- React Implementation
- AI-assisted Development
- Debugging, Testing & Refinement

OUTCOME

Build a complete, practical project suitable for portfolio development.

WEEK 05

GitHub, Deployment & Live Projects

- Git & GitHub
- Repository Management
- Hosting
- Deployment
- Environment Variables
- Portfolio Presentation

OUTCOME

Deploy a project and make it accessible online.

WEEK 06

Client Acquisition & Professional Practice

- Finding & Approaching Clients
- Client Requirements
- Professional Communication
- Proposals & Pricing Fundamentals
- Project Delivery
- Portfolio & Freelancing Strategy

OUTCOME

Approach, develop, communicate and deliver professional client work.

PRACTICAL PAID PROJECT

Week 06 also introduces a real-world paid-project workflow, so that students understand how professional client work is planned, developed, communicated and delivered.

04 LIVE CLASS STRUCTURE

3 live classes every week

MONDAY · WEDNESDAY · FRIDAY · APPROXIMATELY 1.5 HOURS PER CLASS

The course is practical and active participation is expected. In addition to live classes, students should dedicate time outside class hours to practice, assignments, revision and project development.

05 CAREER & EARNING OBJECTIVE

The purpose of this course is not simply to teach coding syntax. The objective is to help students develop practical skills that can be applied toward freelancing, client projects, employment, personal projects and online work.

EARNING POTENTIAL

May earn up to PKR 30,000 per month

06 COURSE COMPLETION

Certificate of Completion

Students who successfully complete the course requirements will receive a Certificate of Completion confirming completion of the AI Web Development Course.

07 FIRST COURSE BATCH

Special First-Batch Recognition

Two students from the first course batch will receive a special gift. Further details will be announced during the course.

YOUR CURRENT KNOWLEDGE IS ONLY THE STARTING POINT

You are not expected to enter this course as a Web Developer. The objective is to guide you through the fundamentals of Web Development, AI-assisted development, practical project building, deployment, and the basics of finding and working with clients.

Learn. Build. Deploy. Grow.
